

APPENDIX B

Emergency Discharge Sites

See notes in Section 4.1 regarding the potential need to modify / augment over-pumping sites to deal with future flood events. Over-pumping sites will be selected to provide the most effective arrangements to maintain services, whilst minimising environmental effects. Where practical, sites that have been used previously are expected to be re-used (when necessary), but the use of different locations cannot be ruled out, if hydraulic conditions dictate.

Refer Longparish IRP for further details of potential overpumping arrangement.

Locations used for tankering in 2020 and 2021

Tankering was from the St Mary Bourne WPS, and locations within St Mary Bourne village.

Timing for Deployment of Tankers and Over-pumps in previous winters

Location	Tankering			Over-pumping		
	Start Date	Stop Date	Typical Number of Tankers	Start Date	Stop Date	Typical Number of Pumps
St Mary Bourne Village & WPS	11/03/20	24/05/20	4-8	Not required		
St Mary Bourne Village & WPS	07/01/21	23/04/21	1-4	Not required
